

## Sprint Planning Report

**Sprint:** 2

**Date:** 2-Nov-2025

**Product:** HireHub – Intelligent Recruitment Platform

### 1. Sprint Goal:

Enhance the HireHub platform by implementing advanced password recovery options (phone number and security questions), adding the "Save Job" feature for job seekers, developing the employer analytics dashboard, implementing job application tracking for job seekers, and creating a notification system for employers to provide a more complete and user-friendly recruitment experience.

### 2. Selected Product Backlog Items (with Acceptance Criteria):

- **User Story 1: Enhanced Password Recovery (US-003 - Enhancement)**
  - **Title:** As a user, I want to reset my password using my phone number or security questions in addition to email, so that I have multiple options to regain access to my account.
  - **Description:** This enhancement extends the existing password recovery feature to include phone number verification and security question options, giving users more flexibility in account recovery
  - **Acceptance Criteria:**
    - User can choose between email, phone number, or security questions for recovery
    - Phone number recovery sends an OTP (One-Time Password) via SMS
    - Security questions are set during registration and can be answered during recovery
    - All recovery methods successfully reset the password
    - Recovery process is secure and validates user identity
- **User Story 2: Save Job Feature (US-015)**
  - **Title:** As a job seeker, I want to save jobs to a "Saved Jobs" list so that I can review and apply to them later.
  - **Description:** This feature allows job seekers to bookmark jobs they're interested in and access them easily from their dashboard without having to search again.
  - **Acceptance Criteria:**
    - Job listings show a "Save" icon/button
    - Clicking "Save" adds the job to the user's "Saved Jobs" list
    - Saved jobs appear in a dedicated "Saved Jobs" section on the dashboard
    - Users can unsave jobs from the list
    - Saved jobs persist across sessions

- **User Story 3: Employer Analytics Dashboard (US-012 - Enhancement)**

- **Title:** As an employer, I want to view analytics about my job postings so that I can track performance and make informed hiring decisions.
- **Description:** This feature provides employers with a comprehensive analytics dashboard showing metrics like views, applications, and applicant demographics for their job postings.
- **Acceptance Criteria:**
  - Dashboard displays total views and applications per job posting
  - Analytics show applicant demographics (experience level, education)
  - Data is visualized using charts and graphs
  - Dashboard updates in real-time as new applications arrive
  - Employers can filter analytics by date range and job posting

- **User Story 4: Resume Upload (US-005)**

- **Title:** As a job seeker, I want to upload my resume in PDF or Word format so that employers can download and review my full credentials.
- **Description:** This feature allows job seekers to upload their resume documents, which can be accessed by employers when reviewing applications.
- **Acceptance Criteria:**
  - Upload button accepts PDF and Word (.doc, .docx) formats
  - File size limit is clearly displayed (max 5MB)
  - Resume preview shows after successful upload
  - Users can replace or delete uploaded resumes
  - Uploaded resumes are accessible to employers viewing the profile

- **User Story 5: Profile Update Functionality (US-006)**

- **Title:** As a job seeker, I want to update my profile information at any time so that my profile stays current and accurate
- **Description:** This feature enables job seekers to edit and update any section of their profile, including personal information, experience, education, and skills.
- **Acceptance Criteria:**
  - Edit button available on all profile sections
  - Changes are saved immediately upon submission
  - Validation ensures required fields remain filled
  - Profile completion percentage updates dynamically
  - Success message confirms saved changes

- **User Story 6: Application Filtering (US-008)**

- **Title:** As an employer, I want to view and filter applicants by skills and experience so that I can shortlist candidates efficiently.
- **Description:** This feature provides employers with filtering tools to sort and review applications based on specific criteria like skills, experience level, and education.
- **Acceptance Criteria:**
  - Filter options include skills, years of experience, and education level
  - Multiple filters can be applied simultaneously
  - Filter results update instantly
  - Number of matching candidates is displayed
  - Filters can be reset to show all applicants

- **User Story 7: Job Application Tracking (US-016 )**

- **Title:** As a job seeker, I want to track the status of my job applications so that I know where I stand in the hiring process.
- **Description:** This feature provides job seekers with a comprehensive view of all their submitted applications, including current status (submitted, under review, shortlisted, rejected, etc.) and application timeline.
- **Acceptance Criteria:**
  - Dashboard shows all submitted applications with current status
  - Application status updates automatically when employer takes action
  - Timeline view shows application submission date and status changes
  - Filter applications by status (Active, Rejected, All)
  - Notification when application status changes

- **User Story 8: Employer Notification System (US-017 )**

- **Title:** As an employer, I want to receive notifications when candidates apply to my jobs so that I can respond promptly to new applications.
- **Description:** This feature sends real-time notifications to employers when new candidates apply to their job postings, ensuring timely review of applications.
- **Acceptance Criteria:**
  - Employer receives in-app notification when a new application is submitted
  - Email notification sent to employer for new applications
  - Notification includes candidate name, job title, and application date
  - Notification center shows all unread notifications
  - Employers can mark notifications as read or delete them

### 3. Sprint Backlog Breakdown (Tasks):

- **User Story 1 - Enhanced Password Recovery (US-003)**
  - **Design Password Recovery Options UI** – Assigned to: Albandri Alsadon – Estimated Effort: 6 hrs
  - **Implement Phone Number Verification** – Assigned to: Ghada Altemyat – Estimated Effort: 10 hrs
  - **Create Security Questions System** – Assigned to: Jadel Alsaeri – Estimated Effort: 8 hrs
  - **Integrate SMS Service for OTP** – Assigned to: Ghada Altemyat – Estimated Effort: 8 hrs
  - **Test All Recovery Methods** – Assigned to: Joud AlShahrani – Estimated Effort: 5 hrs
- **User Story 2- Save Job Feature (US-015)**
  - **Design Save Job Icon/Button** – Assigned to: Albandri Alsadon – Estimated Effort: 4 hrs
  - **Create Saved Jobs Database Schema** – Assigned to: Jadel Alsaeri – Estimated Effort: 6 hrs
  - **Implement Save/Unsave Functionality** – Assigned to: Ghada Altemyat – Estimated Effort: 8 hrs
  - **Build Saved Jobs Dashboard Section** – Assigned to: Albandri Alsadon – Estimated Effort: 8 hrs
  - **Test Save Job Feature** – Assigned to: Joud AlShahrani – Estimated Effort: 4 hrs
- **User Story 3 - Employer Analytics Dashboard (US-012)**
  - **Design Analytics Dashboard UI** – Assigned to: Albandri Alsadon – Estimated Effort: 10 hrs
  - **Implement Analytics Data Collection** – Assigned to: Jadel Alsaeri – Estimated Effort: 10 hrs
  - **Create Data Visualization Charts** – Assigned to: Albandri Alsadon – Estimated Effort: 10 hrs
  - **Build Analytics API Endpoints** – Assigned to: Ghada Altemyat – Estimated Effort: 8 hrs
  - **Implement Real-time Updates** – Assigned to: Jadel Alsaeri – Estimated Effort: 8 hrs
  - **Add Date Range Filtering** – Assigned to: Ghada Altemyat – Estimated Effort: 6 hrs
- **User Story 4 - Resume Upload (US-005)**
  - **Design Resume Upload Interface** – Assigned to: Albandri Alsadon – Estimated Effort: 5 hrs
  - **Implement File Upload Functionality** – Assigned to: Ghada Altemyat – Estimated Effort: 8 hrs
  - **Create File Storage System** – Assigned to: Jadel Alsaeri – Estimated Effort: 7 hrs
  - **Add Resume Preview Feature** – Assigned to: Albandri Alsadon – Estimated Effort: 6 hrs
  - **Test File Upload and Validation** – Assigned to: Joud AlShahrani – Estimated Effort: 4 hrs
- **User Story 5- Profile Update Functionality (US-006)**
  - **Design Edit Profile UI** – Assigned to: Albandri Alsadon – Estimated Effort: 5 hrs
  - **Implement Profile Update API** – Assigned to: Jadel Alsaeri – Estimated Effort: 8 hrs
  - **Add Form Validation** – Assigned to: Ghada Altemyat – Estimated Effort: 6 hrs
  - **Test Profile Update Flow** – Assigned to: Joud AlShahrani – Estimated Effort: 4 hrs
- **User Story 6 - Application Filtering (US-008)**
  - **Design Filter UI Components** – Assigned to: Albandri Alsadon – Estimated Effort: 7 hrs
  - **Implement Filter Logic** – Assigned to: Jadel Alsaeri – Estimated Effort: 10 hrs
  - **Create Filter API Endpoints** – Assigned to: Ghada Altemyat – Estimated Effort: 8 hrs
  - **Test Filtering Functionality** – Assigned to: Joud AlShahrani – Estimated Effort: 5 hrs

- **User Story 7 - Job Application Tracking (US-016 )**
- **Design Application Tracking Dashboard UI** – Assigned to: Albandri Alsadon – Estimated Effort: 8 hrs
- **Create Application Status Database Schema** – Assigned to: Jadel Alsaeri – Estimated Effort: 7 hrs
- **Implement Status Update Logic** – Assigned to: Ghada Altemyat – Estimated Effort: 10 hrs
- **Build Timeline View Component** – Assigned to: Albandri Alsadon – Estimated Effort: 8 hrs
- **Add Filter by Status Feature** – Assigned to: Jadel Alsaeri – Estimated Effort: 6 hrs
- **Test Application Tracking System** – Assigned to: Joud AlShahrani – Estimated Effort: 5 hrs
  
- **User Story 8- Employer Notification System (US-017 )**
- **Design Notification Center UI** – Assigned to: Albandri Alsadon – Estimated Effort: 7 hrs
- **Create Notification Database Schema** – Assigned to: Jadel Alsaeri – Estimated Effort: 6 hrs
- **Implement In-App Notification System** – Assigned to: Ghada Altemyat – Estimated Effort: 10 hrs
- **Integrate Email Notification Service** – Assigned to: Ghada Altemyat – Estimated Effort: 8 hrs
- **Build Notification Badge Component** – Assigned to: Albandri Alsadon – Estimated Effort: 5 hrs
- **Add Mark as Read/Delete Features** – Assigned to: Jadel Alsaeri – Estimated Effort: 6 hrs
- **Test Notification System** – Assigned to: Joud AlShahrani – Estimated Effort: 5 hrs

#### 4. Sprint Capacity and Velocity:

- Team Capacity: 600 total units of work (baseline starting point shown in burndown chart)
- Estimated Velocity: 24 units completed per day (as reflected in the linear drop across sprint days)
- Planned Work: 600 total units at sprint start
- Available Hours / Work Remaining: Burndown chart shows a reduction from 600 → 0 across the sprint duration
- Factors Affecting Capacity: None identified (no holidays or absences affecting velocity)

#### 5. Risks and Impediments:

**Risk:** Integration complexity with SMS service for phone verification.

**Mitigation:** Research and select a reliable SMS API provider early in the sprint. Conduct integration testing as soon as the API is set up.

**Risk:** Analytics dashboard data visualization may require additional charting libraries.

**Mitigation:** Identify and install necessary charting libraries during sprint planning. Use familiar libraries like Chart.js or Recharts.

**Risk:** File upload feature may encounter security vulnerabilities.

**Mitigation:** Implement strict file type validation, size limits, and virus scanning. Conduct security testing on all file upload endpoints.

**Risk:** Notification system may cause performance issues with high volume.

**Mitigation:** Implement notification queuing system and batch processing. Use background jobs for email notifications.

**Risk:** Email notification service integration delays.

**Mitigation:** Select reliable email service provider (e.g., SendGrid, AWS SES) early. Have fallback option ready.

## **6. Definition of "Done":**

- All code committed and pushed to the Git repository
- Unit and integration testing completed successfully
- UI/UX matches design mockups and follows the design system
- Database operations verified with sample data
- Peer code review approved by at least one other team member
- No open bugs in major functionalities
- Features are accessible and responsive across different devices
- Documentation updated for new features
- Security testing completed for sensitive features (password recovery, notifications)
