

Sprint Review Report

Sprint: 2

Date: 22 -Nov-2025

Product: HireHub – Intelligent Recruitment Platform

Sprint Goal: Enhance the HireHub platform by implementing advanced password recovery options (phone number and security questions), adding the "Save Job" feature for job seekers, developing the employer analytics dashboard, implementing job application tracking for job seekers, and creating a notification system for employers to provide a more complete and user -friendly recruitment experience.

I. Sprint Goal Achievement and Completed Work

1.1 Sprint Goal Review

Sprint Goal Achieved: Yes

Achievement Details: The development team successfully implemented all 8 planned user stories for Sprint 2. The enhanced password recovery system now offers multiple recovery options, the Save Job feature is fully functional, the employer analytics dashboard provides comprehensive insights, job seekers can track their applications in real -time, and employers receive instant notifications for new applications. All features passed their acceptance criteria and stakeholder review.

1.2 Completed Work Demonstration

The Development Team demonstrated the following completed Product Backlog items:

- US-003: Enhanced Password Recovery (Phone Number & Security Questions)
- US-015: Save Job Feature
- US-012: Employer Analytics Dashboard
- US-005: Resume Upload
- US-006: Profile Update Functionality
- US-008: Application Filtering
- US-016: Job Application Tracking
- US-017: Employer Notification System

Key functionalities and features demonstrated:

- Multi -option password recovery: Users can now reset passwords via email, phone number (OTP), or security questions
- Save Job functionality: Job seekers can bookmark jobs and manage them from a dedicated "Saved Jobs" section
- Analytics Dashboard: Employers can view detailed metrics including job views, applications, and applicant demographics with visual charts
- Resume Upload: Job seekers can upload PDF/Word resumes with preview functionality
- Profile Updates: Users can edit their profiles with real -time validation and completion tracking
- Applicant Filtering: Employers can filter candidates by skills, experience, and education with instant results
- Application Tracking: Job seekers can monitor all their applications with status updates and timeline view

- Notification System: Employers receive instant in -app and email notifications when candidates apply

All stakeholder questions were addressed during the demonstration.

1.3 Acceptance Criteria Verification

Verification of Acceptance Criteria:

All acceptance criteria were met for each demonstrated item. The enhanced password recovery system successfully validates users through all three methods. The Save Job feature correctly persists data across sessions. The analytics dashboard displays accurate, real -time data with responsive visualizations. The application tracking system provides clear status updates, and the notification system delivers timely alerts through multiple channels. All features demonstrated smooth integration and met quality standards.

Minor improvements identified include optimizing notification delivery for high -volume scenarios and adding push notifications for mobile users, which will be addressed in future sprints.

II. Product Increment and Stakeholder Feedback

2.1 Product Increment Discussion

Current State of Product Increment: The HireHub platform now offers a comprehensive end-to-end recruitment solution with enhanced security features, improved user experience for job seekers with application tracking and saved jobs, powerful analytics tools for employers, and a real -time notification system that keeps all users engaged. The platform supports complete recruitment workflows with advanced features that significantly differentiate it from basic job platforms.

Alignment with Product Goal: This increment significantly advances the product vision of

creating an intelligent, user -friendly recruitment platform. The analytics dashboard and application tracking provide the "intelligent" aspect, while the enhanced recovery options, save job features, and notification system improve the "user -friendly" experience for all stakeholders.

Value to Users/Customers: Job seekers benefit from greater account security, the ability to track their applications in real -time, and convenience with multiple password recovery options and job bookmarking. Employers gain valuable insights through the analytics dashboard and stay informed with instant notifications, enabling faster response times and data -driven hiring decisions. The platform now provides substantial value to both user groups, significantly enhancing satisfaction and engagement.

2.2 Stakeholder Feedback

Key Feedback Received:

Positive Feedback:

- Password recovery flow is clearer and easier for users.
- The Save Job feature works well and is easy to use.
- UI design has improved and is more consistent than before.
- Backend API responses are faster after recent updates.
- Integration between frontend and backend was demonstrated smoothly.

Enhancement Requests:

- Add clearer validation and error messages for users.
- Improve user flow between screens to make navigation easier.
- Increase UI consistency across all pages.

Next Steps Based on Feedback:

- Add more detailed validation and user -friendly error messages.

- Improve page layout and ensure consistent visual design.
- Review and refine the user flow for the next sprint.

2.3 Product Backlog Review

Product Backlog Adjustments: Updated backlog to include stakeholder enhancement requests. Reprioritized remaining items based on user feedback and business value. Interview scheduling and mobile improvements moved to high priority for Sprint 3.

Newly Discovered Work:

- Push notification system for mobile users
- Interview scheduling module
- Mobile app development or responsive web improvements
- Advanced search filters with salary and location options
- Application withdrawal feature for job seekers
- Multi -job posting management dashboard for employers
- Candidate comparison tool for employers

III. Progress and Next Sprint Planning

3.1 Progress Toward Product Goal

Contribution to Product Goal: Sprint 2 has substantially advanced the HireHub platform toward becoming a comprehensive, intelligent recruitment solution. The analytics capabilities provide the intelligence employers need, the application tracking gives job seekers transparency, and the notification system keeps everyone engaged in real -time. The platform is now positioned as a highly competitive solution in the recruitment technology space.

Impediments:

- SMS service integration took longer than estimated due to API documentation gaps (resolved through vendor support)
- Analytics dashboard required additional optimization for large datasets (addressed through database indexing)
- Notification system email delivery had initial delays (resolved by implementing queue-based processing)
- No major blockers remaining

3.2 Next Sprint Planning Preview

Potential Items for Next Sprint:

- Interview scheduling functionality (high priority)
- Push notification system for mobile users (high priority)
- Mobile responsiveness improvements (high priority)
- Advanced search filters with salary range and location (medium priority)
- Application withdrawal feature (medium priority)
- Multi-job posting management dashboard (medium priority)
- Performance optimization and scalability improvements

3.3 Action Items

Action Item	Owner	Deadline
Backlog with Sprint 3 items	Product Owner	03-Nov-2025
Schedule Sprint 3 Planning Meeting	Scrum Master	03-Nov-2025
Research interview scheduling tools/APIs	Development Team	07-Nov-2025
Prepare mobile responsiveness assessment	Frontend Developer	09-Nov-2025
Investigate push notification service	Backend Developer	10-Nov-2025

IV. Summary and Closing

4.1 Summary of Key Takeaways

Key Takeaways:

- All Sprint 2 objectives achieved with 8 user stories completed successfully
- Enhanced security and user experience features well-received by stakeholders
- Application tracking and notification systems provide significant competitive advantage
- Analytics dashboard provides substantial value to employer users
- Platform maturity and feature completeness advancing rapidly
- Strong team collaboration and technical execution maintained throughout sprint

Team Accomplishments: The team completed 235 hours of planned work across 8 major user stories, demonstrating excellent velocity and quality. Integration challenges with SMS and email services were overcome through effective collaboration, and all features met or exceeded acceptance criteria. The addition of application tracking and notification system shows the team's ability to handle complex, interconnected features. The team demonstrated strong technical skills and agile practices throughout the sprint.

4.2 Next Steps

Thank you to all attendees for their participation and valuable feedback. The next sprint planning session will be held on 28-Nov-2025 at 10:00 AM. The team will focus on interview

scheduling, push notifications, and mobile responsiveness to continue delivering value to HireHub users and maintaining competitive advantage in the market.

Meeting Attendees:

- Joud AlShahrani - Product Owner
- Jadel Alsaeri - Scrum Master
- Albandri Alsadon - Frontend Developer
- Ghada Altemyat - Backend Developer
